

Procedures for Scheduling the EGSA Technician Certification Exam

Ferris State University (FSU) has registered proctors at testing centers in colleges across the country. When you are ready to take the test, you must first contact FSU to determine the test site that is nearest you and they will provide you with the contact information for the registered proctor at the testing center. FSU will then email the testing center notification of your desire to take the EGSA exam and copy you in on the email. Once received, you will then contact the test center to schedule a test date that fits your schedule and that of the testing center.

After you have arranged a test date, it is imperative that you complete and submit “**The Test Candidate Information Sheet**” below along with the “**Test Order Form**” (found on the other side of this document) containing payment information. The test will then be sent to the testing center and you will be sent a tester registration form which is your entrance to the exam and must be presented at the testing center the day you test. **Please note that test candidates are responsible for all proctoring fees charged by the testing centers at the time they sit for the exam.** In the event that FSU doesn’t have a testing location within reasonable distance, FSU will work with you and will contact facilities in your area to arrange for testing.

Please feel free to contact FSU to obtain the contact information for the testing center nearest you or if you have any further questions. **Please be advised that a score of 80% or 160 questions out of 200 answered correctly is required to pass.**

Sincerely,

Ferris State University

EGSA Electrical Generator Systems Journeyman Certification Program

The EGSA Journeyman Certification was created as an advanced level certification. The EGSA Journeyman exam is very broad in scope and is assumed that the technician will have had experience, classroom training and on the on-the-job training or a combination of the aforementioned. The EGSA Journeyman exam is difficult and covers a broad spectrum of generating systems. It is however, forthright and fair. The exam was developed by a panel of industry experts and covers topics that industry wants its technicians to know. Certified technicians can proudly display their "EGSA Certified Electrical Generator Systems Journeyman Technician" certification.

Item Number - EGSA Member	Item Number - Non-Member	Quantity	Item Description	EGSA Member Price	EGSA Non-Member Price	Item Total
FSU195			EGSA Electrical Generator Systems Technician Journeyman Certification Exam - EGSA Member	\$150.00
